Lab 03 Matlab Conversion

Aaron Swoboda and Oliver Hall

2025-04-15

This file aims to convert a series of Matlab scripts and data files into a R Markdown file that replicates the Tol (2023) Lab 3 for the economics of climate change. https://github.com/rtol/ClimateEconomics

The Matlab files this replicates are:

- MLIAM01.m
- MLIAM.mat
- init01.m
- MRHparam.m
- MRH.m
- RFparam.m
- RadForc.m
- STparam.m
- ST.m
- init02.m
- Popparam
- Outputparam
- CO2param
- init03.m
- MLIAM03.m

Overview - the MLIAM03.m script

```
# clear all
# load MLIAM
# initO1
# init02
# init03
# for t=StartYear+1:EndYear,
      i = t - StartYear + 1;
#
      MRHbox(i,:) = MRH(MRHbox(i-1,:), CO2global(i-1), MRHlife, MRHshare, CO2convert);
#
      CO2conc(i) = sum(MRHbox(i,:));
#
      RF(i) = RadForc(CO2conc(i), RFO, CO2O);
      [atmtemp(i) \ oceantemp(i)] = ST(atmtemp(i-1), oceantemp(i-1), RF(i), STpar);
#
#
          population(i,:) = population(i-1,:).*(1+popgrowth);
#
          popgrowth= popdecline*popgrowth;
#
          TFPgrowth= TFPdecline*TFPgrowth;
#
      end
      if t > 1960.
#
#
          capital(i,:) = invest(capital(i-1,:),output(i-1,:),savings,depreciation);
          TFP(i,:) = TFP(i-1,:).*(1+TFPgrowth);
```

```
#
                 end
#
                 if t >= 1960,
                           output(i,:) = CobbDouglas(TFP(i,:), capital(i,:), population(i,:), lambda).*(1-relabcost(i-1,:))
#
#
                            consumption(i,:) = (1-savings)*output(i,:);
#
                 end
#
#
